SUMMARY

Computer Science and Engineering undergraduate with hands-on experience in full-stack web development using the MERN stack. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, RESTful APIs, authentication, database management, and software development. Experienced in building scalable web applications with React.js, Node.js, Express.js, and MongoDB. Seeking a Software Development Engineer Intern or Full-Stack Web Development Intern opportunity to apply problem-solving and software engineering skills.

EDUCATION

Haldia Institute of Technology, West Bengal

Bachelor of Technology (B.Tech) – Computer Science and Engineering, CGPA: 7.8/10

Pursuing

Senior Secondary (Class XII), 72.5%

Secondary (Class X), 82.6%

PROJECTS

Eventora – Event Booking Platform | Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, OTP Authentication, Razorpay

- Developed a full-stack event booking platform enabling users and organizations to create, manage, and book events.
- Implemented OTP-based authentication and user verification to provide a secure authentication workflow.
- Integrated Razorpay payment gateway for secure online event booking and payment processing.
- Designed and developed RESTful APIs for authentication, event management, booking, and payment operations.
- Built a responsive React.js frontend with reusable components and API integration.
- Implemented booking management functionality for tracking event bookings and confirmations.

ApnaBazaar – E-Commerce Platform | Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, OTP Authentication, Razorpay

- Developed a full-stack e-commerce platform with product browsing, cart management, checkout, order tracking, and product management.
- Implemented JWT-based authentication and OTP-based user verification.
- Integrated Razorpay for online payment processing during checkout.
- Developed product search, filtering, category management, and responsive user interfaces.
- Built RESTful backend APIs using Node.js and Express.js for products, users, carts, and orders.
- Used MongoDB and Mongoose for database design and data management.

Blog Application – MERN Stack | Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, Cloudinary

- Developed a full-stack blogging platform with role-based access control for Admin, Writer, and Reader users.
- Implemented authentication and authorization using JWT.
- Developed CRUD functionality for creating, updating, retrieving, and deleting blog posts.
- Implemented image upload functionality and integrated cloud-based media storage.
- Added like/unlike functionality and user interaction features.
- Designed RESTful APIs using Node.js and Express.js with MongoDB for persistent data storage.

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript

Frontend Development: HTML5, CSS3, React.js, React Router, Redux, Context API, Zustand

Backend Development: Node.js, Express.js, RESTful APIs, MVC Architecture

Databases: MongoDB, Mongoose

Authentication & Security: JWT Authentication, OTP Authentication, Role-Based Access Control, Cookies

Payment Integration: Razorpay

Development Tools: Git, GitHub, VS Code, Postman

Deployment & Platforms: Vercel, Render

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS, REST APIs, Problem Solving

ACHIEVEMENTS

- Solved 200+ Data Structures and Algorithms problems on LeetCode and other competitive programming platforms. - Strong understanding of Arrays, Linked Lists, Stacks, Queues, Trees, Graphs, Recursion, Searching, Sorting, and Dynamic Programming. - Hands-on experience developing and deploying full-stack applications using the MERN stack.

AREAS OF INTEREST

Full-Stack Development | Software Engineering | Data Structures and Algorithms | Backend Development | System Design | Cloud and Distributed Systems
